8.1 Comparison to Global Mesh Refinement

Table I. Timing using the Big Guy model for our scheme (feature adaptive patching) compared against our global table driven subdivision method and the previously published GPU subdivision algorithm by Shiue et al.. Note that all timings include final rendering, while we additionally break out draw time for our global subdivision scheme.

Subdivision Level	0	1	2	3	4
Feature Adaptive Patching	0.10	0.20	0.34	0.81	2.30
Shiue Subdivision	0.62	7.26	13.97	21.42	34.93
Global Table Subdivision	0.06	0.18	0.79	3.07	12.05
Draw Time (Table Subd.)	0.04	0.06	0.37	1.45	5.78

Feature Adaptive Subdivision

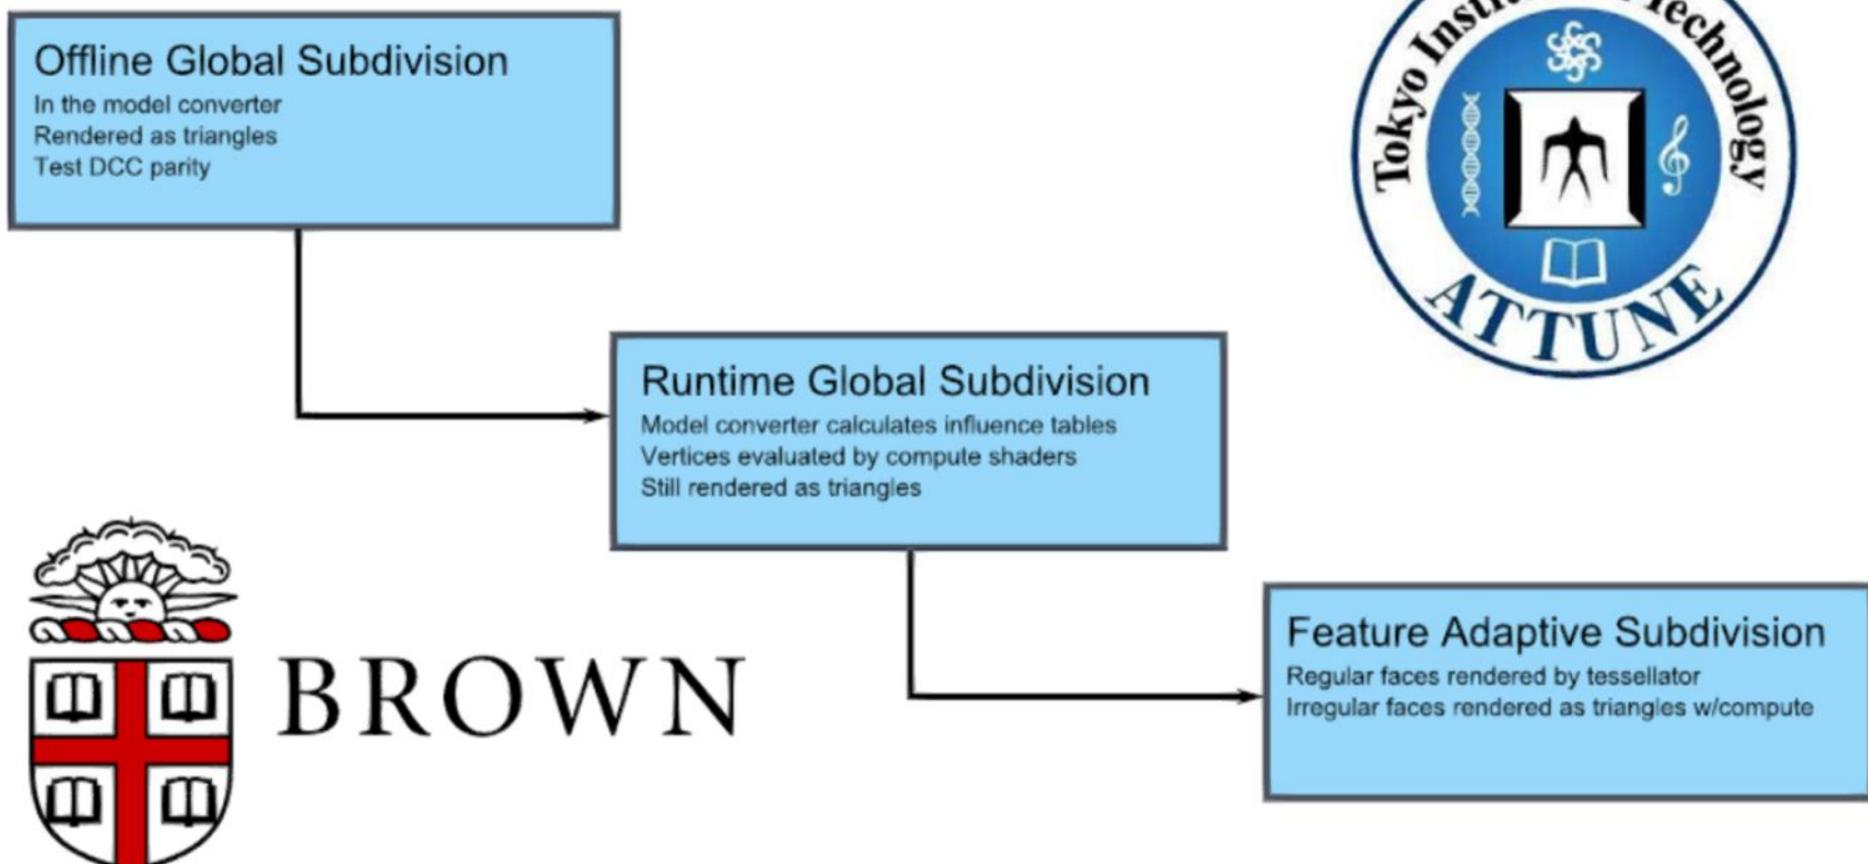

Nießner's implementation

Edge Extrapolation

Hull shader
Tweaks control points

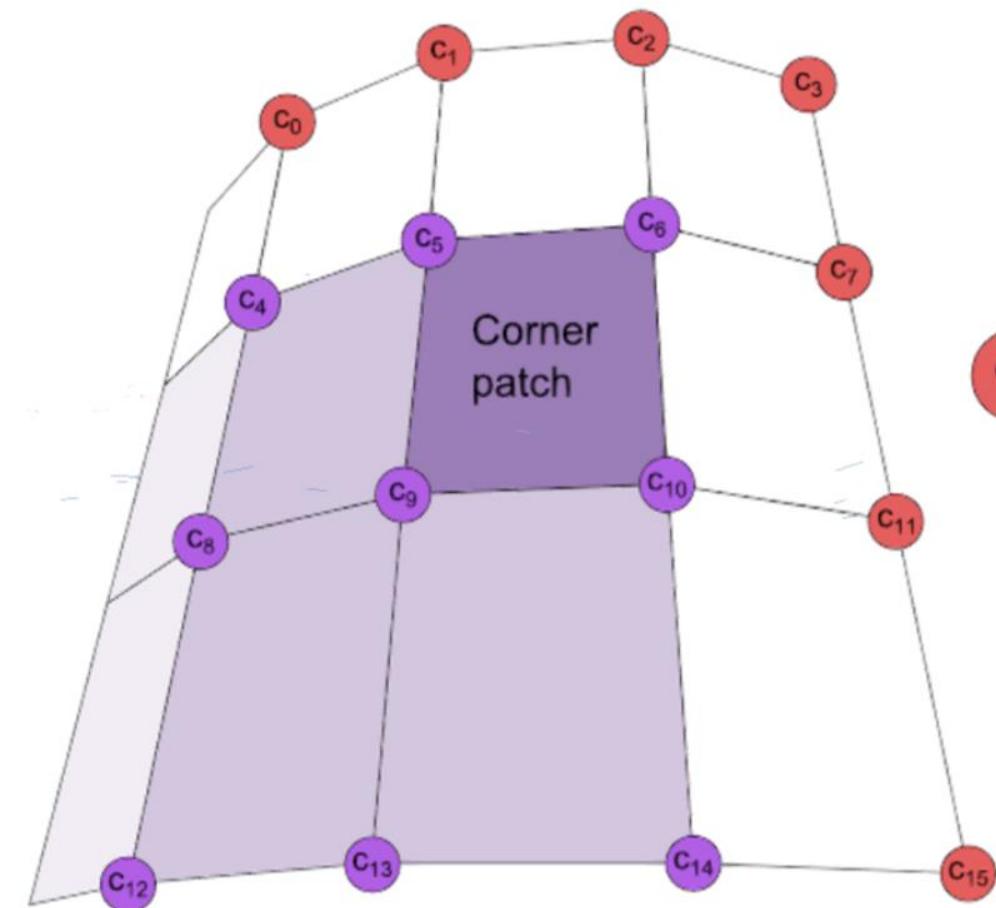

$$C_0 = 2(C_4 - C_8)$$

$$C_1 = 2(C_5 - C_9)$$

$$C_2 = 2(C_6 - C_{10})$$

$$C_3 = 2(C_7 - C_{11})$$

Corner Extrapolation

Hull shader
Tweaks control points

$$c_3 = 4c_6 - 2c_5 - 2c_{10} + c_9$$

$$c_0 = 2c_4 - c_8$$

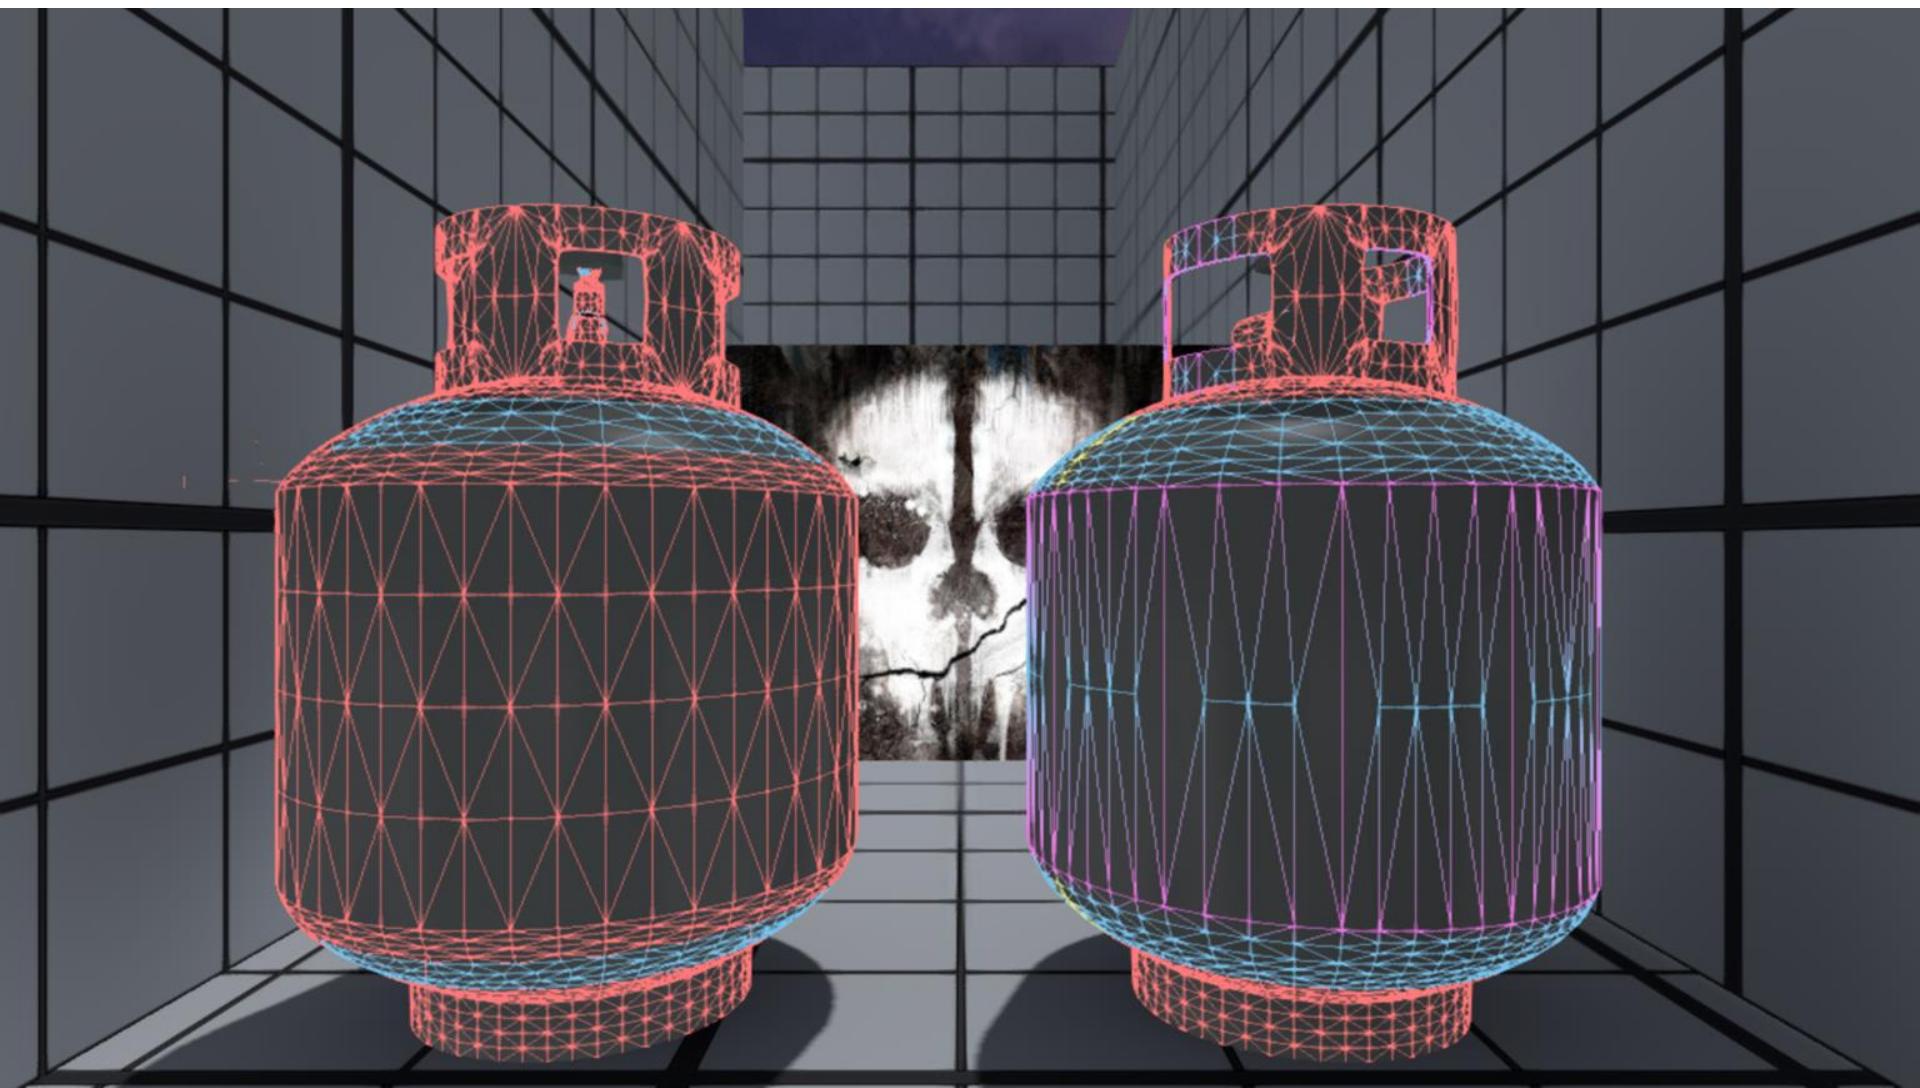

$$c_7 = 2c_6 - c_5$$

$$c_1 = 2c_5 - c_9$$

$$c_{11} = 2c_{10} - c_9$$

$$c_2 = 2c_6 - c_{10}$$

$$c_{15} = 2c_{14} - c_{13}$$

Cache the compute shader output

Compute dispatch serialization

The background of the image is a dark, moody scene featuring a white silhouette of a figure standing in a field of tall grass. In the distance, there are silhouettes of people and a chair-like object. The sky is dark with some faint shapes. A solid red rectangular banner is positioned at the bottom of the image, containing the text "Analysis: Depth Only" in large, white, sans-serif font.

Analysis: Depth Only

A close-up photograph of a foosball table. Two grey, textured balls are positioned near a white goal post on a red playing surface. The background shows the blurred figures of spectators and a colorful wall with abstract art.
